Note: If you are new to this game, we suggest you play it on Easy difficulty first. First you must select the difficulty level. Easy Medium Hard Ace There are four single player missions and two

---

multiplayer campaigns to complete. You must also complete the final four single player missions and the last two multiplayer missions to unlock the Tiberium on the PC version of the game. First, play the tutorial and select the missions you would like to play. You can continue to play those missions or select new missions to play. There are several new single player missions in this version of the game. Each mission has a mission code (ccn) and a mission number (2,3,4,5,6,7,8,9,10,11). Depending on the mission code (ccn), it may be easier or harder to complete. For example, if you are playing on the Easy difficulty level, you can complete 82157476af
